

New from the Mercury

We live on a planet that has finite resources and a fragile ecology.

It is projected that there will be seven billion people on the planet by late 2011.

The increased growth in the size of our global population is placing enormous pressures on our planet's resources.

- **Over population and the population debate**
- **Global food and water security**
- **Climate change and environmental refugees**
- **Energy resource depletion**
- **Renewable energy resources**
